I have 5+ years of experience in Architecting & developing frontend for medium & large scale applications in a startup environment. I have shouldered responsibilities for project management, requirement analysis, and have been diligently involved in interviewing and recruiting candidates, training new team members and mentoring interns.

🕒 EXPERIENCE

- **Freelancer** Mumbai, India
Senior Software Engineer Jul 2020 – Current
 - **Jewelfleet:** Architected & Implemented the server side rendering in React with Redux for responsive E-commerce application. Worked on Authentication, Device Identification, Product filters & Pagination. In the team of 2 assigned tasks, performed code reviews & implemented POCs.
- **Kustard Technologies** Mumbai, India
Senior Software Engineer Apr 2018 – Apr 2020
 - **Digital Signage:** Developed & Architected Multitenant application for IOT domain. Managed 2 team members, project timeline and attained high performance with code splitting & lazy loading.
 - **Prodace:** Developed SAAS product that provides an online workspace for film productions. Worked on WebSockets, Web Storage API & Custom HOC for conditional rendering of UI. Successfully launched the product before the timeline which helped the client receive early feedback.
 - **Hbits:** Worked as frontend lead for the responsive real estate ownership platform. Architected web frontend, performed code reviews, extended library features for design needs & as a additional responsibility developed APIs.
 - **Wings & Wheels:** Undertook full ownership to develop the flight booking platform. Implemented the filters & sort for flight results on client side. Accomplished flexibility in design using custom components & performance gain by minimizing unnecessary renders using PureComponent.
 - **Simba:** The first React project which helped set the base for all the future projects. Developed a dashboard for an order tracking and analytical platform of a top beer brand in India. Achieved performance improvement for rendering large datasets using the “windowing” technique from initial 3k records to 50k records.*Software Engineer* Mar 2017 – Mar 2018
 - **Runners Wall of Fame(Tata Mumbai Marathon):** Developed a web-based platform to analyse statistical data & provide personalized insights to 10,000+ runners. Implemented the project in a tight deadline of 1 week for a 10-feet display.
 - **Snappbox:** Developed customer and admin platforms for pickup & delivery of logistics. Implemented key features like RTL for Arabic language, partial saving of form data using Web Storage API, & integrating Geocoding service.
 - **Exrup:** Designed and developed dashboard for a SAAS product of digital business cards. Worked on implementation of responsive business card layout, ReCaptcha and Excel export.
- **LiveFiesta** Mumbai, India
Frontend Developer July 2016 – Jan 2017
 - Designed and developed webapp for event ticketing platform to transition offline ticket booking experience to online. Constructively executed the entire project flow using Angular 2 and Bootstrap.
 - Accomplished 10% increase in ticket sales by targeting customers using SEO strategies combined with UI/UX.
- **TechGenium** Mumbai, India
Frontend Developer & Co-Founder Jun 2015 – May 2016
 - Developed multiple web-based products addressing specific needs for small and medium scale businesses.

⚙️ TECHNICAL SKILLS

- **Languages & DB:** Proficient in JavaScript, ES6, CSS, & HTML. Experience with Node, MySQL, PHP
- **Frameworks:** React, Redux, Redux-Thunk, React-Bootstrap, jQuery, Wordpress, Angular 2, SCSS, Bootstrap, Flask.
- **Build & Other Tool:** Git, npm, Webpack, Babel, Bash, Adobe XD.

🏠 INITIATIVES

- **CLI Generator:** Developed an in-house tool to scaffold new React projects from 2 hours to 30 minutes.
- **Training Session:** Conducted sessions on Design-Dev review & Estimations, Git workflow & Effective Google search.
- **Blogs:** Publishing engaging blogs to share pragmatic knowledge & profitable skills to thousands of developers.

🎓 EDUCATION

- **KJSCE, University of Mumbai** Mumbai, India
Bachelor of Engineering in Information Technology
