I have 5+ years of experience in designing & developing medium & large scale applications in a startup environment.

## ❂ EXPERIENCE

### Kustard Technologies
Mumbai, India
*Senior Software Engineer*
*Apr 2018 – Apr 2020*

- **Digital Signage**: Developed SASS project that manages the Signage app on Raspberry pi from the Web Dashboard. Worked on writing testable and modular code, managed project timeline and attained high performance with code splitting & lazy loading.
- **Prodace**: Designed & developed a SASS product that provides an online workspace for film productions using Websockets, Permission-based UI. Successfully launched the product 15 days before deadline which helped the client receive swift feedback from users.
- **Wings & Wheels**: Undertook full ownership to develop the flight booking platform and delivered it within the deadline with pixel-perfect design. Accomplished flexibility, performance improvement, and reduced overhead.
- **Simba**: Executed client communication, managed project and single-handedly developed a dashboard for an order tracking and analytical platform of a top beer brand in India. Thoroughly researched and integrated a high-performance library to expand display of tabular data from only 3,000 records to 50,000.

*Software Engineer*
*Mar 2017 – Mar 2018*

- **Runners wall of fame(Marathon)**: Developed a web-based platform to analyse statistical data & provide personalized insights to the runners. Implemented the project in a tight deadline of 7 days with accomodations for a 10-feet display. Used by 10,000+ users during the marathon expo event.
- **Snappbox**: Efficiently developed customer and admin platforms for pickup & delivery of logistics that helped transition to an online portal resulting in increased savings. Implemented key features like RTL for Arabic language, partial saving of form data, and allowing the user to add addresses from google maps.
- **Exrup**: Designed and developed dashboard as a sole frontend developer for a SASS product of digital business cards. Tackled several challenges including implementation of responsive business card layout, color picker, ReCaptcha and Excel export of data.

### LiveFiesta
Mumbai, India
*Frontend Developer*
*July 2016 – Jan 2017*

- Constructively executed the entire project's flow and designed and developed a webapp for event ticketing platform in Angular 2 to transform offline ticket booking experience to online.
- Accomplished 10% increase in ticket sales by launching the portal and targeting online customers using both UI/UX and SEO strategies.

### TechGenium
Mumbai, India
*Frontend Developer & Co-Founder*
*Jun 2015 – May 2016*

- Developed multiple web-based products addressing specific needs for small and medium scale businesses.

## ⚙ TECHNICAL SKILLS

- **Languages & DB**: Proficient in Javascript, ES6, CSS, & HTML. Experience with Node, MySQL, PHP
- **Frameworks**: React, Redux, React-Bootstrap, jQuery, Wordpress, Angular 2, SCSS, Bootstrap, Flask.
- **Build & Other Tool**: Git, Webpack, Babel, Bash.

## ⚗ INITIATIVES

- **CLI tool**: Developed an in-house tool to reduce set-up time for new React projects from 3 hours to only 30 minutes.
- **Training Session**: Conducted sessions on Design-Dev review & Estimations, Git workflow & Effective Google search.
- **Blogs**: Publishing engaging blogs to share pragmatic knowledge & profitable skills to thousands of developers.

## 🎓 EDUCATION

### University of Mumbai
Mumbai, India
*Bachelor of Engineering in Information Technology;*
